Orcrist is a one-stop project management and analysis tool. This 24/7 web based tool provides our customers access to categorized information based on authentication levels.

Project management generally consists of the following

- Project Monitoring
- Team Collaboration
- Issues Management
- Bug Tracking
- Document Management
- Finance Management

Typically organizations use separate tool and processes to control the various aspects of project planning and execution. Orcrist uses an integrated approach to address the diverse needs of a project, making it a complete project management, collaboration and analysis tool. This integrated approach enables our customers to better manage the project using drill down approach, feedback loops and visual clues. The intuitive user interface and zero client side installation ensure a higher adaptation rate across the organization. This directly translates into greater productivity, transparency and control.

An online demo of the system is available at <http://www.orcrist.com>

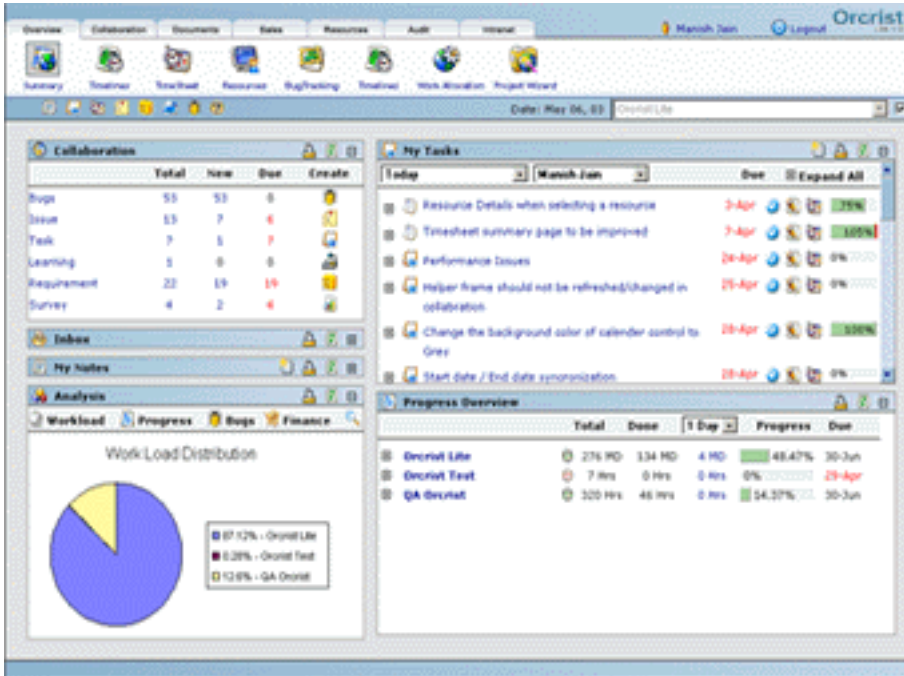

Exhibit 1:

Project Overview

This is the first screen seen by the user after login. This screen provides the overall progress report of the project. Additionally, it delivers all relevant events and alerts that relate the user to her inbox. The user can personalize the system extensively; choose date formats, time zones, etc.

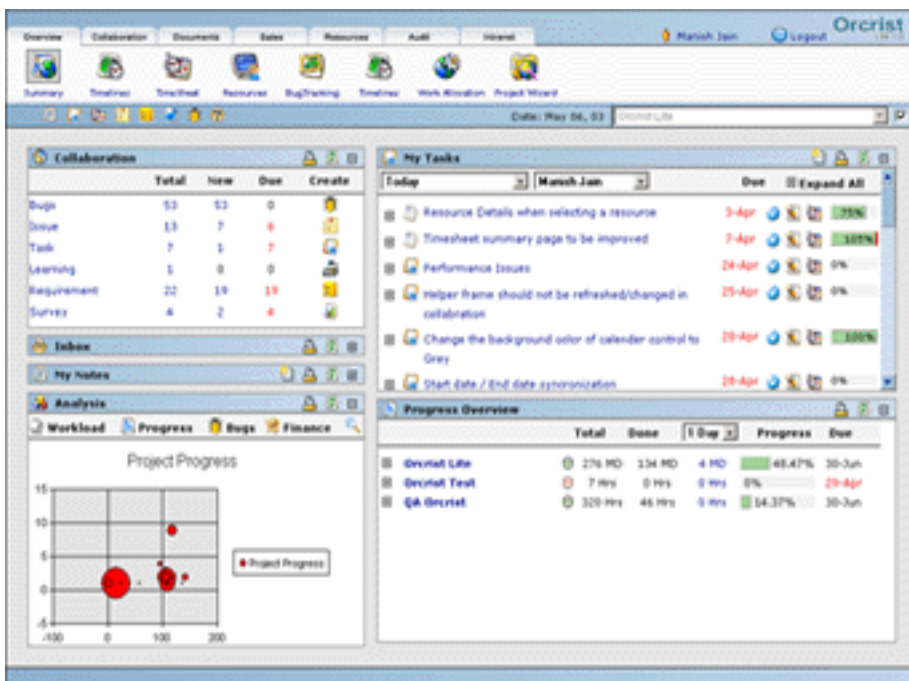

Exhibit 2:

Project Progress

The user can drill down individually into the various modules of the project to see its progress. Each module can contain sub-modules and activities. The tool tracks and lists the detailed progress. It draws a PERT chart for each activity. The user can go to the overview format to see the workload distribution.

Exhibit 3:
Project Timesheet

Authorized users can monitor the team progress consolidated from individual timesheets based on the activities. Users can drill down into each team member's daily progress report, consolidate module wise or query for a fixed interval of time. He can analyze the progress of each module on similar dimensions.

The screenshot shows the Orcrist Project Timesheet interface. On the left, there is a calendar for May 2003 and a 'Project Navigator' showing various project modules like 'Orcrist Life', 'Orcrist Test', and 'QA Orcrist'. The main area displays a 'Time Sheet Summary' table with columns for 'Total (7 days)', '30 Apr (Week)', '1 May (Tue)', '2 May (Wed)', '3 May (Thu)', '4 May (Fri)', '5 May (Sat)', and '6 May (Sun)'. The table lists team members and their hours worked across these days.

	Total (7 days)	30 Apr (Week)	1 May (Tue)	2 May (Wed)	3 May (Thu)	4 May (Fri)	5 May (Sat)	6 May (Sun)
Aditya Vikram	22	6	6	6	0	0	4	0
Engendra Kumar	28.5	6	7.5	0	0	0	7	0
Kumar Abhishek	36	9	6	7	6	0	8	0
Manoj Jain	35.4	6	9	10.2	0	0	6.2	0
Manoj Kumar	15.5	6	7.5	0	0	0	0	0
Neveen-Chandra Valla	26	5	2	9	0	0	10	0
Nehant Singh	22.2	6	0.2	6	0	0	8	0
Rajesh Chaudhry	31.5	8	9	9	0	0	5.5	0
Ritesh Kumar Shrivastava	5.5	3.5	2	0	0	0	0	0
Tarika Das	32.4	16.4	8	0	0	0	8	0
Vivek Bhat	7	4	3	0	0	0	0	0
Total	254	81.9	68.2	67.2	6	0	58.8	0

Exhibit 4:
Project Resource

Authorized users can browse and drill into the resources utilized in the project. The system can consolidate resources from several vendors into one. In the Phase II, Orcrist is being enhanced to manage shared pools of expensive resources like a common team of Quality Assurance specialists who can be multiplex between various projects, based on the booking.

The screenshot shows the Orcrist Project Resource interface. It displays a list of resources categorized into 'Employees', 'Customers', and 'Others'. Each entry includes details like name, title, security group, and allocated till date.

Category	Name	Title	Security Grp	Allocated Till
Employees	Naresh Tiwary	Food & Beverages	Developers	31-Mar-04
	Kalidharan	Food & Beverages	Developers	31-Mar-04
	Chandra Shouhan Jha	Transportation	Developers	31-Mar-04
	Ganesh Yadav	Security Guard	Developers	31-Mar-04
Customers	Mike Tyler	mike@owish.com	Customer (DT)	22-May-03
	Bob Brown	bob@owish.com	Manager (Technical)	22-May-03
	Jan Goblet	jan@owish.com	Engineers (DT)	21-May-03
Others	Pankaj III BODE WU	M6 - 80US, 84M - 254 MB, HDG - 30.6 GB & 40 GB, Display Card - S15 6326, Sound card - On Board, Samsung CD Drive - 52X, Logitech Serial mouse, Samsung Monitor, Logitech Keyboard, Operating system - Windows 2k Server with SQL Server 7 and VSS. (FD).		28-May-03
	CD Writers	Hewlett Packard CD Writer, Model No - C4504A		29-May-03
	Laptop of Nehant			22-May-03

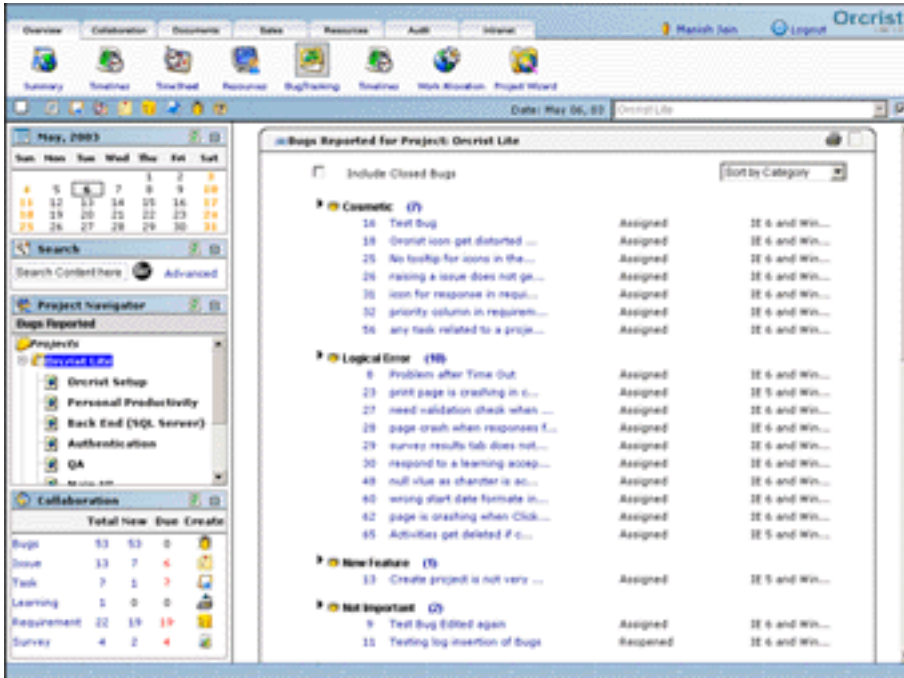

Exhibit 5:
Bug Tracking System

The tool provides a detailed bug tracking system integrated into the workflow engine. The QA team can directly assign bugs to team members based on the area of bug or leave it unassigned. All unassigned bugs are automatically routed to the team manager who can then assign it to specific team member. The system can automatically generate 'regression testing' checklist based on the QA feedback.

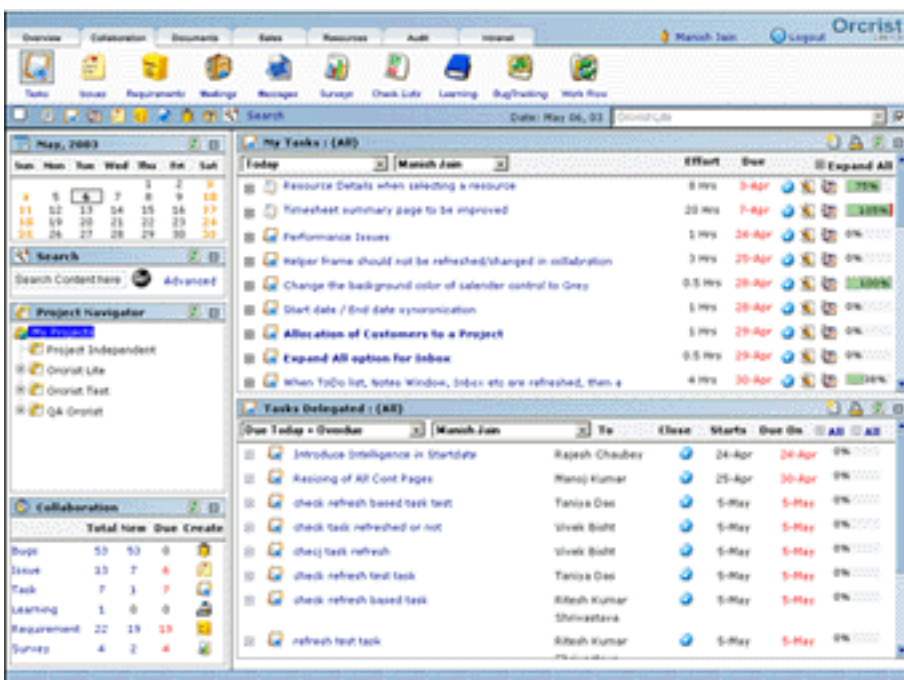

Exhibit 6:
Collaboration Systems

The tool provides very powerful collaboration capabilities to facilitate team productivity and organize issues/tasks/messages to be archived for central lookup. Orcrist supports multi-threaded issues, discussion, surveys and tasks. Further issues and tasks can be routed based through the workflow manager to be assigned to individuals and groups.

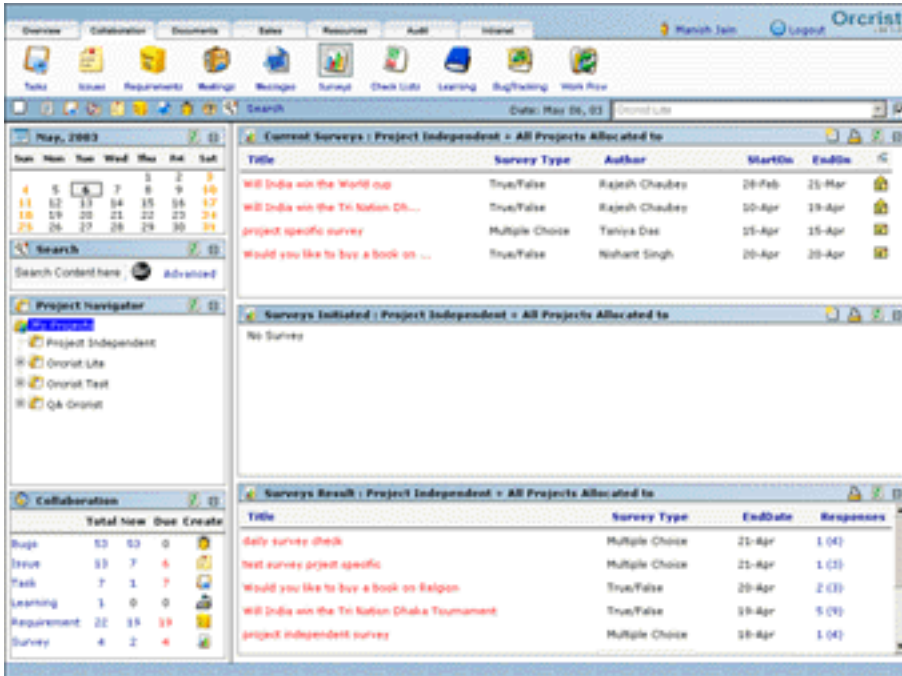

Exhibit 7:

Collaboration System – (Survey)

Orcrist is geared to handle all your survey needs related to the project and organization, from simple choices of user interface to more 'secure' survey like peer reviews, it can handle all. The survey wizard is an easy to use system and comes with various useful options like private results, screened group, poll logs, etc.

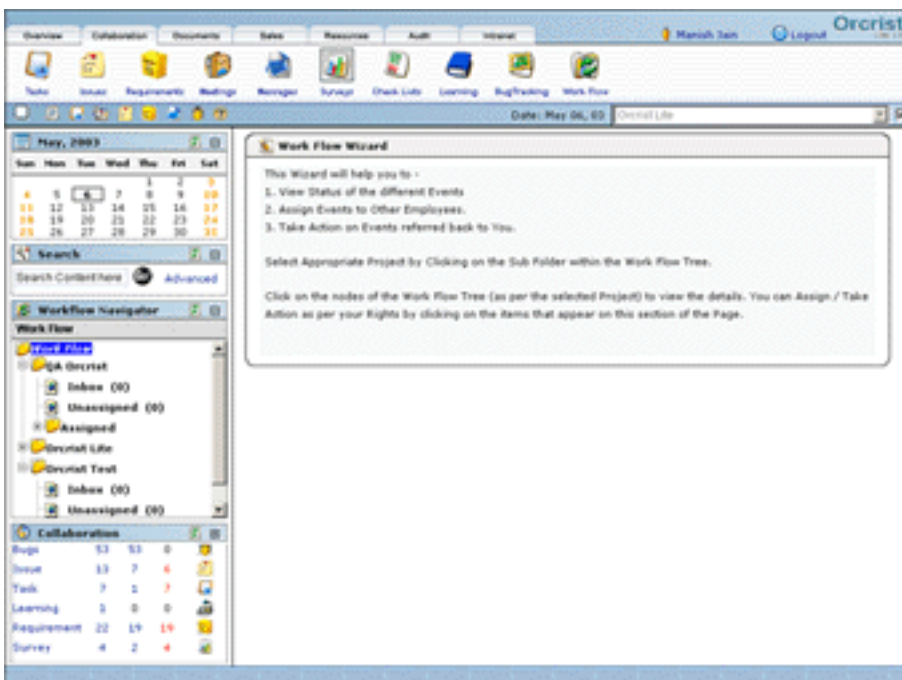

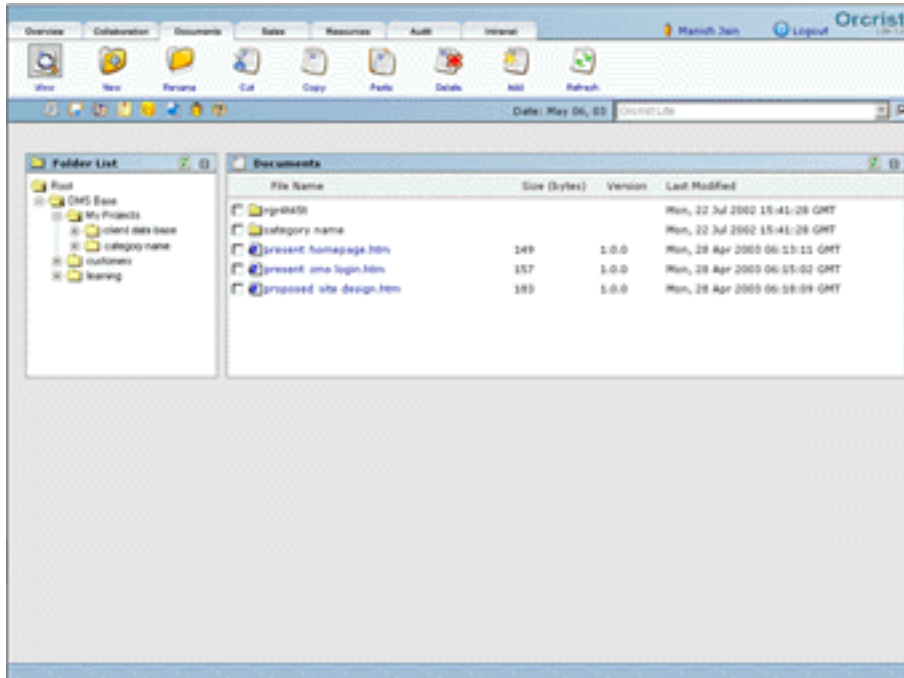

Exhibit 8:

Collaboration System – (Work Flow)

The Orcrist collaboration system rides on a powerful workflow engine, which enables users to route tasks, issues, requirements, bugs and messages to other members and follow the progress. Delegations can be automated and shared to reduce the burden of the project manager and to decentralize control. The system provides rich audit - trail feature to revisit the entire history of the problem and actions taken on it thus providing greater team accountability.

**Exhibit 9:****Document Management**

The tool provides capabilities to archive and securely access organized documents of various formats. It also assists in managing documents related to collaboration functions like issues, tasks, bugs, etc. This central reservoir can be further linked to the knowledge management systems and Certification systems (ISO 9000, Level 3, Level 4, etc). Soon this reservoir would provide a "WebDav" interface to enable it to directly integrate with the Windows Explorer.
